STATION LIST AND DETAILS

Header and content info:

STATID: distinctive station identifier for stations of:

(1) BACI-experiments composed of "station no." "days before/after impact" "area" "treatment" "year" and

(2) gradient analysis composed of "station no. (followed by no. of haul, if applicable)" "GR (for gradient analysis)" "area" "fisheries intensity ("0" for unfished reference area, "U" for unknown, i.e. to be derived for

STATID-example: STATID "5 TO .A. K. 2019" identifies station no. "5" of a BACI-experiment at "TO" (day 1 before experimental impact) in area "A" disturbed by multiple experimental fishing events using commercial shrimp beam trawls ("IV") in the year "2019"

STATID-example: STATID "B2_east-l-port_2021" identifies the experimental fishing track in area "B2" at specific location "east." and first haul "I" of multiple tows along same track with the portside beam trawi "-port" in the year "2021" STATID-example: STATID "61_GR_NDS06_U_2020" identifies station no. "6" and haui "1" of gradient analysis "GR" in area "NDS06" affected by an unknown fisheries intensity "U" (to be calculated from VMS-data) and sampled in the year "2020"

STATID-peculiarities: in case of area NDS12 and NDS13 the station no. is not supplemented by haul no. to form STATID

LOCATION: locality or geographical region

VESSEL: name of vessel (FV, fishing vessel; RV, research vessel; FRV, fisheries research vessel; MPV, multi-purpose vessel)

DATE: date of action in dd.mm.yyyy-format time of action in hh:mm:ss-format as Central European Summer Time [CEST]

TIME: waypoint positions for towed gear (e.g. beam trawls) are serially numbered "001" to "###"

WAYPOINT:

sampling device "G" denotes 0.1m2 van Veen grab, "BT" 2m-beam trawl with chain matt, and fishing gear "TBB" commercial shrimp beam trawl (for experimental impact) DEVICE:

BEAM LENGTH beam length [m] of beam trawls deployed

PURPOSE: purpose of deployment, as sampling of "endofauna", "epifauna", and "sediment", or experimental fishing "impact"

ACTION: on ground" as moment in which device touches sea bed, "fishing" as towing the gear over ground, and "hoisting" as start of spooling up the warp

LATITUDE/LONGITUDE: geographic north/east coordinates in decimal degrees POSITION:

position obtained either by (D)GPS-antenna of "vessel", underwater position of "device" (using underwater position obtained either by (D)GPS-antenna of "vessel", underwater position of "device" (using MagicMapper MF)

additional information as free text; abbreviation "TZ" stands for navigationals software "TimeZero" COMMENT:
